DETAILED ACTION

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art either taken singularly or in combination fails to disclose the invention as claimed. Particularly, the combination of Hironaka (JP 04-187990) and Makoto (JP 08-178556) or the combination of Davis and Blankenberger fails to disclose a heat exchanger comprises a pair of heat exchanger cores having a U-turn intermediate tank connected with one end sides of the tubes; an inflow-side tank connected with the other end sides of the tubes; an outflow side tank formed to be separated from the inflow side tank; the outflow side tank being connected with the other end sides of the tubes contained in the other of the heat exchange core, wherein the inflow-side tank, the outflow side tank and the intermediate tank are attached to a vehicle body, wherein the inflow-side tank and the outflow-side tank are attached to the vehicle body side through brackets and bolts which are set to allow a relative movement there between so that both heat exchanger cores can expand and contract independently from each other with respect to the intermediate tank.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
